

CORPORATE IDENTITY

One connected identity.

The Midpoint brand system
with a proposed Midpoint Fuel extension.

Built from the real brand.

A practical identity system for designers, app developers, printers and partners. Existing artwork and live website facts are separated from new design recommendations.

Source-verified	Proposed in this guide
Original vector symbol and Midpoint wordmark from the supplied PDF.	Fuel lockup, app icon, minimum sizes and clear-space rules.
Live website reverse logo, Figtree font and colour values.	Print, layout, photography, tone and application standards.
JV email naming decision and ten-screen app concept.	App styling and wording examples; subject to product confirmation.

Read first: pages 3-5 explain the brand; 6-14 cover visual and verbal rules; 15-17 develop the Fuel identity; 18-23 show applications; 24-25 cover handover and sources.

A place for business to thrive.

Midpoint brings business space and everyday convenience together in Midrand. Its identity should feel capable, connected and welcoming.

Capable

Communicate clearly. Lead with the space, service or next step that helps someone get on with their day.

Connected

Show relationships between people, places and practical services. Use consistent navigation and recognisable brand cues.

Welcoming

Keep the language human and the design open. Warmth comes from useful detail, people and natural light.

Proposed brand idea: Business, brought together. Use as an internal creative direction; it is not an approved public tagline.

Make the next step obvious.

Audience	What they need	How the brand responds
Business occupiers	Clear information about space and practical suitability.	Specific details, useful photographs and a direct enquiry route.
Brokers and partners	Reliable facts and consistent assets.	Readable schedules, versioned files and clear contact ownership.
Estate community	Convenient services and a sense of place.	Friendly wayfinding and concise service information.
Fuel app users	Confidence about location, fuel, amount and transaction status.	Legible figures, explicit confirmation and calm recovery messages.

Fuel audiences are an extension proposed for the JV concept. Confirm access rules, eligible users and service scope with the operating team before launch.

Midpoint first. Fuel made clear.

Midpoint
The parent estate identity.

Midpoint Fuel
The fuel-service extension requested in the JV
correspondence.

Use "Midpoint" in running text and "Midpoint Fuel" for the service. The website address retains its hyphen: www.mid-point.co.za. Partner ownership or endorsement wording requires joint approval.

Original geometry. Full vector.

The symbol

The continuous rising M is original artwork. Its curves, diagonal edges and proportions are preserved.

The wordmark

Midpoint lettering is supplied as outlines. Do not recreate it by typing the name in Figtree or a substitute font.

The master file

Midpoint.svg reproduces the live header: cyan symbol and white lettering, with a transparent background.

Give the identity room to work.

Clear space

Keep at least x on every side of the complete logo. Clear space sits outside the SVG artwork box; add it in the layout.

Proposed minimum widths

Midpoint: 160 px / 40 mm.

Midpoint Fuel: 240 px / 60 mm.

Symbol alone: 32 px / 8 mm.

160 px reference

240 px reference

These are starting limits, not historical brand rules. Inspect at actual output size. Increase size for embroidery, low-resolution displays and distant signage.

Choose the version for its surface.

WEBSITE REVERSE / DARK SURFACE

POSITIVE / LIGHT SURFACE

SINGLE COLOUR / DARK INK

SINGLE COLOUR / WHITE REVERSE

Keep the full logo intact. No stretching, rotation, shadows, gradients, outlines, cropped letters or replacement type. On photographs, use a calm dark panel with the reverse version.

A precise, recognisable palette.

Deep green

#082121

RGB 8 / 33 / 33
CMYK* 76 / 0 / 0 / 87

Bright cyan

#39EAE6

RGB 57 / 234 / 230
CMYK* 76 / 0 / 2 / 8

White

#FFFFFF

RGB 255 / 255 / 255
CMYK* 0 / 0 / 0 / 0

Light grey

#CACDD5

RGB 202 / 205 / 213
CMYK* 5 / 4 / 0 / 16

Slate grey

#6D7280

RGB 109 / 114 / 128
CMYK* 15 / 11 / 0 / 50

Suggested balance: deep green and white provide the main surfaces. Cyan marks actions, highlights and the symbol. Greys organise secondary information; they should not dull the overall identity.

*CMYK figures are unprofiled mathematical starting values, not approved press matches. The vivid screen cyan will shift in process print. Use the printer's output profile and approve a physical proof. No Pantone equivalent is assigned.

Use cyan where it stays readable.

Aa 123 16.80:1 White / deep green	Aa 123 11.27:1 Cyan / deep green	Aa 123 11.27:1 Deep green / cyan
Aa 123 4.81:1 Slate / white	Aa 123 10.57:1 Light grey / deep green	Aa 123 1.49:1 White / cyan

For normal interface text, target at least 4.5:1; for large text, at least 3:1. White on cyan fails both. Use deep green text on cyan buttons. Pair status colour with a label or icon, and check focus, disabled and error states separately.

Ratios calculated from the listed sRGB values. WCAG 2.2, criterion 1.4.3. Logo artwork is exempt from that text criterion; readable applications remain the goal.

Figtree. Clear, human, confident.

Aa Bb Cc 0123456789

Regular 400 Medium 500 Semibold 600 Bold 700

Role	Weight	Suggested scale	Use
Display / hero	600	36-60 px / 1.0-1.1 line height	Short headlines with clear line breaks.
Section heading	600	28-40 px / 1.1-1.2	One idea per section.
Body	400	16-18 px / 1.5	Comfortable reading on web and app.
UI labels / buttons	600	14-16 px / 1.25	Short, sentence-case actions.
Caption / metadata	400-600	12-14 px / 1.4	Supporting information, not critical figures.

Observed on the desktop homepage: hero 60/60 px at 600; body 16/24 px at 400. The scale above is a proposed system, not a complete audit of every page. Use system sans-serif only when Figtree cannot load.

Useful words. A confident voice.

Professional

Be accurate and composed. Use concrete descriptions and explain the next action without jargon.

Approachable

Speak to people as people. Use “you”, clear verbs and short sentences. Avoid corporate distance.

Optimistic

Present opportunity through useful benefits. Keep claims specific and supported.

Instead of	Use
A revolutionary, world-class ecosystem.	Space and services for your working day.
Click here to commence your journey.	Explore available space.
Oops! Something went wrong!!!	We could not load this information. Try again.
Enjoy guaranteed unbeatable savings.	Show the verified price and any confirmed saving.
These are newly written examples. Use South African English: centre, colour, organisation, petrol and litres. Keep product names in title case; use sentence case for headings and buttons.	

A consistent message, by context.

Context	Suggested message	Action
Estate introduction	A connected place for your working day.	Explore Midpoint
Leasing communication	Find space that fits your business.	View available space
Fuel brand introduction	Fuel for the day ahead.	Explore Midpoint Fuel
Before launch	Midpoint Fuel is being developed for the estate.	Keep me informed
Operational support	Let's help you with your last transaction.	View transaction

Claim discipline: "Fuel for the day ahead" is a suggested campaign line, not part of the logo. Confirm opening status, fuel grades, operating hours, pricing, savings and app functions before publishing. Never copy demonstration figures into live marketing.

Show the place. Leave space.

Clear headline.

One useful sentence. One next step.

Photography

Use recognisable estate architecture, purposeful people and natural daylight. Keep verticals straight and colour restrained.

Use actual site and service imagery when available. Label renders or future facilities clearly.

Layout

Use generous margins, clear alignment and large areas of white or deep green. Let one image or message lead. Use cyan for emphasis rather than filling every surface.

Image above: existing Midpoint website asset; subject to the asset owner's usage rights. The brand treatment does not certify that a pictured facility is operational.

A natural extension of Midpoint.

The original M symbol and Midpoint lettering carry recognition. A deliberately spaced FUEL descriptor adds a clear service category without introducing a competing emblem.

Prepared for the Blend / Roadnett JV app discussion. Naming is confirmed in the email; this visual lockup and its applications are proposed for approval.

Keep the family resemblance.

Source-faithful

Reuse the nine original PDF vector paths. The symbol remains intact. The Midpoint wordmark is moved as a single group, without reshaping.

A clear descriptor

FUEL uses Figtree Bold 700, converted to vector outlines with open letter spacing. It aligns with the left edge of the Midpoint wordmark.

Production-safe

SVGs contain paths, no raster images or live font dependencies. The master artwork has a transparent background.

Construction: 1219.8848 × 240 viewBox; wordmark translated upward 55 units; FUEL starts at x=584.7275 with baseline y=239, nominal type size 88 and 15-unit added character spacing.

One identity, several settings.

LIGHT SURFACE

DARK SURFACE

App icon proposal

Use the M symbol with FUEL inside a deep green field. Keep the full name alongside it in store listings and onboarding.

Square icon is a design master, not a tested app-store submission. Apply platform masks and inspect small-size readability before release.

Translate the brand into the app.

Token / role	Value	Guidance
Brand surface	Deep green #082121	App header, identity panels and key totals.
Primary action	Cyan #39EAE6 + deep green text	Use one clear primary action per screen.
Page / card	White / #F5F7F7	Neutral surfaces keep transaction data readable.
Text / muted	Deep green / slate #6D7280	Use the muted style only when contrast remains sufficient.
Spacing / shape	4, 8, 12, 16, 24, 32 px / 12-16 px radii	Proposed rhythm; adapt for device size.
Type / input	Figtree 16 px body / 48 px control height	Proposed practical starting sizes; test with users.

Reserve separate, tested semantic colours for success, warnings and errors. Do not make brand cyan mean every status. Critical actions need explicit labels.

Recognisable at every step.

Scaled brand concepts only. No prices, balances, savings or payment capabilities are asserted. Confirm all product flows with the app team.

Keep financial actions unambiguous.

Concept stage	Brand / content direction
Home + dashboard	Introduce Midpoint Fuel. Use verified prices with an update time; show savings only when calculated and supported.
Find a fuel point + scan	Make location, availability and the scanned point explicit. Show a safe retry when the code cannot be read.
Vehicle + fuel selection	Display vehicle, fuel grade, unit price, quantity and estimated total together. Require a clear review step.
Payment + fuelling	Distinguish authorisation from payment completion. Use explicit statuses; never imply completion from a loading indicator.
Completion + history	Show confirmed transaction details, reference and receipt access. Explain pending or failed transactions plainly.
Network view	Label only verified locations and opening information. Use a clear empty state when none are available.

The supplied ten-screen concept is exploratory. Wallet, loyalty, home-account payments, locations, fuel grades and 24/7 operation are not validated by this identity work. These remain product and operating decisions.

Consistent beyond the screen.

ILLUSTRATIVE SIGN FACE

Signage

Use vector artwork, generous space and strong contrast. Confirm viewing distance, fabrication and required safety signage with the operator.

Documents

Use the parent or service logo once in the header. Use Figtree, readable tables and current contact details. Keep terms separate from marketing.

Partners

Keep partner marks separate with equal respect for clear space. Do not add “powered by”, ownership claims or JV percentages without approval.

Simple shapes. Purposeful movement.

Directional accents

Use sparse rising diagonals that echo the symbol. Keep them behind the layout and outside logo clear space. Never use a pattern as a substitute for the M.

Iconography

Use one consistent set of simple line icons. Start with a 24 px grid and a 1.5-2 px stroke. Match corner and stroke treatment; pair unfamiliar icons with labels.

Motion

Use brief, restrained fades or slides for orientation. Start with 150-250 ms for interface feedback. Keep the logo rigid and respect reduced-motion preferences.

Data graphics

Prioritise values and units. Use deep green for data, cyan for emphasis and grey for context. Label series directly where possible.

Avoid

No decorative flames, generic petrol-pump clip art, competing gradients or fabricated 3D marks. Keep safety signs and required hazard symbols independent.

A system people can recognise.

Document template

For A4, start with 18-22 mm margins, a 40-55 mm parent logo and 10.5-11 pt body text. Use 1.4-1.5 line spacing.

Social template

Choose one message, one focal element and one action. Keep key content away from crop edges; proof each platform size.

Email signatures

Use live text for name, role and contacts, with a small PNG logo for broad email-client support. Link the website; avoid image-only contact details.

ILLUSTRATIVE A4 & SOCIAL LAYOUTS

Use the right file. Check the result.

File	Use
Midpoint.svg	Exact website reverse logo. Cyan + white. Use on a dark surface.
Midpoint-Fuel.svg	Suggested Fuel positive logo. Cyan + deep green. Use on white.
Midpoint-Fuel-Logo.pdf	Vector Fuel artwork on a white landscape page. For review and scalable placement.
SVG-Variants/	Positive, reverse, monochrome, original PDF conversion and proposed app icon.
Midpoint-Corporate-Identity.pdf	This identity guide, including website-derived facts and proposed standards.

For screen

Use SVG or export PNG at the required size. Preserve the aspect ratio and transparent background. Do not use a screenshot of the logo.

For print

Use the vector master and the printer’s colour profile. Check a physical proof. The supplied PDF is RGB artwork, not certified PDF/X press output.

Before release

Check spelling, contrast, clear space and actual-size legibility. Confirm brand approval, product accuracy and any partner endorsement.

A clear basis for the next step.

1. Supplied artwork. Midpoint@2x (1).pdf, downloaded 28 September 2026. One vector page, nine paths, no embedded raster images. Compared with the PDF attached to Luke's 28 September "Re: JV proposal" email: vector output is identical.
2. Website. www.mid-point.co.za, inspected 29 September 2026. Live header SVG, rendered styles and stylesheet confirmed Figtree, #082121, #39EAE6, #CACDD5, #6D7280 and white. The PDF's rendered dark swatch is approximately #042221; this guide standardises new digital variants to the website's #082121.
3. JV correspondence. Luke / Roadnett "JV proposal" chain, 23-28 September 2026; naming direction on 28 September; BlendApp.png ten-screen concept. Used for brand and interface context only. Commercial terms and personal details are excluded from this guide.
4. Typography & accessibility. Figtree by Erik Kennedy, SIL Open Font License 1.1: github.com/erikdkennedy/figtree. Contrast reference: w3.org/WAI/WCAG22/Understanding/contrast-minimum.html. Logo letters remain outlines; Figtree does not replace the original wordmark.

Approval still required: Fuel artwork and proposed standards; app functionality and content; partner treatment; service launch status; print and signage proofs. This is a complete proposed CI package, not evidence of an approved or launched fuel service.
